

Virtus Diagnostics Medical Genetic Services

Preconception screening for couples is a growing field of clinical genetics that maximises a couples reproductive choices.

Virtus offers a comprehensive, national, reproductive genetic counselling service.

Indications for a referral to a Clinical Geneticist include:

- congenital malformations detected in utero and post delivery
- chromosome abnormalities eg balanced translocations, robertsonian translocations, microdeletions/duplications
- developmental delay and intellectual impairment
- syndrome diagnosis
- sensorineural hearing loss
- family history of genetic diseases
- familial cancer syndromes
- consanguinity
- preconception screening

Professor David Coman

MBBS MPhil FRACP.

David is a highly experienced Medical Doctor having trained in Paediatrics, Metabolic Medicine and Clinical Genetics. David is currently

involved in multiple research projects aimed at novel disease discovery, improved diagnostic testing and treatments for children with Inherited Genetic Disorders.

David's experience, empathy, professionalism, relaxed nature and sense of humor make him well placed to help guide couples through what can be a stressful journey.

Medical Genetic consultations with David can be facilitated rapidly either face to face or via Skype.
